

Incredible Journey p.161

The following not-to-scale layout is an outline of how to make the boxes for Incredible Journey in the National Project WET Curriculum and Activity Guide. There are nine stations in this activity, each station representing one part of the water cycle. There will be one box per station. The labels for the sides of the box are located in the Water Cycle Table (p. 164). These labels represent the options for pathways that water can follow. To make the boxes, it is recommended to use poster board or heavy paper. Fold on all of the lines, cut on the dotted lines, and fold sides up to make the box. You will need tape to keep the sides together.
