The University now requires most employees to have an email address ending with arizona.edu, and makes a table of these “official” addresses available for units to use. This directory lists the University’s official addresses. If your address in this directory is missing or needs to be updated, you or your department’s payroll representative need to edit your entry in the official table. Do this by logging into Employee Link from the UofA web site (<http://www.arizona.edu/>) using your NetID and password. Click on the Personal Information tab and follow the instructions there to change your address.
