
Ph.D. Fellowships in Ecohydrology

The University of Arizona

Ph.D. candidates are being sought for a new training fellowship in Ecohydrology at the University of Arizona, located in Tucson. The program will train students to be highly skilled in working at the interface between ecology and hydrology. The Fellows will obtain degrees from the School of Natural Resources while simultaneously interacting with the Department of Ecology and Evolutionary Biology and the Department of Hydrology and Water Resources. Fellows may also obtain a minor in Global Change. The School of Natural Resources integrates Watershed Management and Landscape Studies; the Departments of Ecology and Evolutionary Biology and of Hydrology and Water Resources are routinely ranked among the very best among relevant peer institutions. The University of Arizona is a public, Research I, Land Grant Institution.

Funding for the Fellowships is provided by the U.S. Department of Agriculture and will include an out-of-state waiver, if needed, and a \$22,000 stipend per year for up to three years. The training program is led by a team that spans the three core academic units: Drs. David D. Breshears, D. Phillip Guertin, Travis E. Huxman, and Paul D. Brooks. Applicants must be U.S. citizens. Interested candidates from groups that are traditionally underrepresented within Natural Resources are particularly encouraged to apply. Starting date should occur by August 2005 for the fall semester. For application materials, contact Academic Coordinator Cheryl Craddock at ccraddoc@email.arizona.edu or (520) 621-7260. To apply, send (e-mail preferred) a cover letter summarizing your background, relevant experience, motivation and interests, a resume including relevant coursework, and contact information for three references to either Dr. D. D. Breshears (daveb@u.arizona.edu) or Dr. D. P. Guertin (phil@nexus.snr.arizona.edu), School of Natural Resources, 1311 E Fourth St., BioSciences East 325, The University of Arizona, Tucson, AZ 85721-0043. Dr.s Breshears and Guertin can be contacted for additional information about the program prior to applying. Review of applications will begin early January and continue until the Fellowships are filled.
