

# Fresh Produce Safety Tip Sheet

DO Exercise everyday to stay in shape  
DON'T Walk through fields as a shortcut on your way to school or a friends house.

DO work and play with pets and project animals  
DON'T walk animals along canal banks or near fields to avoid your animal going to the bathroom near a water source. Animals are forbidden within 30 feet of a farm field.

DO get involved in your neighborhood and within your community.  
DON'T go into agriculture fields unless invited. A field is an active area where food is being grown, it isn't a playground.

DO be a good citizen and keep our city clean  
DON'T ever throw trash or other objects on the ground. When field workers are in the fields, they are required to wear gloves, hair nets and take other sanitary precautions.

Remember that farmers are feeding the entire world and a field is their office—let's help them by keeping ourselves and our pets out of their fields!
